How to measure vibration? How to measure consciousness? how to measure your vibrational frequency

by [Sophie Benshitta Maven](#) — Tags: [vibrational](#), [for no reason](#), [Resistance](#), [your soul](#), [David Hawkins](#) — Category: [Raise your level of consciousness](#), [Raise your vibration](#) — July 10, 2016 [edit](#) [2 Comments](#)

It is good to know where you are at. With all the pretending, with all the charts, you probably overestimate or underestimate your vibration, your "[vibrational frequency](#)".

To measure another person's vibration,

1. you need to be energetically connected to that person (an [empath](#) capacity), or touch them...
2. your vibration needs to be above 200... and even there,
3. you need to be connected to Source,
4. be outside of your ego, to do that... to muscle test the other person's vibration.

My vibration is above 900, I am completely outside of my ego, so I trust my measurements. I share my story of how I went from a vibration of 35 to 185 to 295 to ultimately above 900 in about 50 years... I am 69 now.

People's lives, emotional state, achievements, relationships prove that my measurements are accurate, not only their actual feedback, of which I have a ton.

It's not only how you feel about yourself, but what you can do with your life that testifies and proves your vibration.

I can [measure your vibration](#) for a donation of \$5 or more. I will email you the number, and my experience of you while I was measuring your vibration.

If it is obvious to me, I will also email you my recommendation of a product of mine that will either ease your current discomfort, or will start the process of raising your vibration.

If someone has measured your vibration already... then you want a second opinion. If this is you, email me the person's name or email address... I'll also measure THEIR vibration for you to see how accurate they could be in measuring yours.

Vibration, as we use it to measure your level of [consciousness](#), is a number that is reflective of your world view, your self-view, your ability to use all the faculties you as a human have, and it is very indicative of your state of mind, your mood, your ability to see things accurately, to make astute observations, and to make accurate and effective decisions about your affairs, about people, about stuff.

The measurement of vibration

The measurement of vibration, as I said before, is a number between zero and 1,000.

The scale is logarithmic, Dr. David Hawkins arbitrarily chose a logarithmic scale to show your vibration or consciousness level on his "[map of consciousness](#)." I don't agree with most of his measurements, and most of his statements, by the way. His 'Truth versus Falsehood' book has a puny truth value of 10%. The emotions don't accurately reflect the level of vibration, the level of consciousness... So if you are trying to raise your vibration so you have better mood... raising your vibration is much more complicated than that... and gets you much more.

A logarithmic scale would say that someone with a 900 vibration is still only at around 50% of what a human being can become as a potential.

Saying that those numbers are Hertz is pretentious: it really has nothing to do with vibration, or frequency: it was just made up.¹

But whether it is vibration, or it is consciousness, the vibrational frequency measurement is a useful number.

Vibrational frequency

Although the phenomenon this number shows is not vibrational and not frequency, the number, as I said before is useful.

The number shows where you stand on the consciousness scale.

Consciousness scale divides people to two major groups:

Group 1: lives in hoping, in cause and effect, not knowing that they are cause: instead they are either try to manipulate their own energy, or wait for others to do it for them. This is everyone with a vibrational measurement of 200, 99.99% of humanity.

Group 2: they are aware and [conscious](#) that they are causing. On some level, you cause everything, especially your inner state. In the physical world you cause very little, but in the inner state, including your periphery (body, emotions, mind) you cause or can cause everything.

The dividing line is responsibility and integrity. Responsibility as an inner job, and integrity as an inner job.

Above 200 you begin to gain access to [beingness](#). The ability to come from a way of being that you say... How many beingness state you can come from depends on the number of [DNA](#) capacities active and turned on in your DNA. The average number of capacities is between five and seven.

Your current number of capacities is a combined number of the capacities you inherited from one of your parents, and the number of capacities you have added through extreme effort, hardship, and suffering. There is an experimental energetic method I am testing, that can [turn on a capacity](#). The tricky part is keeping the capacity open by needing it for life. Your life.

Consciousness scale measures to what degree you are aware of your environment and the inner workings of a human, especially yours. And to the degree you have access to higher states of being.

Certain ways of being are only available at certain levels of vibration, or vibrational frequency. For example love is somewhere between 520 and 560 on the vibrational scale.

Love for a reason, or love with an agenda don't qualify to be called love... Love on the vibrational level of being love is pure love, love for no reason, love with no agenda, love for love's sake.

I promise you, you have never seen or experienced love like that: even to experience it, you need to be on the level of love.

Vibration measurement

Measuring vibration is tricky. Why? Because ego wants it to be high.

- 1. A human who has a vested interest for that vibration measurement to be low or high, does not qualify to measure the vibration
- 2. A human whose vibration is low, does not qualify to measure the vibration: their measurements will be inaccurate
- 3. A human who only connects to their mind or ego will not measure vibration correctly. When you truly connect to Source, there is no mind and there is no ego.
- 4. I measure vibration without ego, while connected to Source, which is all-knowledge. I don't care what number comes up, I have no ego in the matter, and I have no gain or loss either way. When I measure vibration, I connect to the person I am measuring their vibration, connect to Source. I feel what the person feels, actually I feel stronger what the person feels, than themselves. I may have an opinion, but the number comes from Source, not me, and not from my opinion.

Summary: I measure your vibration as an indicator. I am more able to help you [raising your vibration](#) if I know where you are at.

Vibration is a very complicated number, but I can tell a world about you through it.

Your vibration number (between 1 and 1000) tells me how you react to things that are happening. Tells me how truthful you are with yourself and others. Tells me the level of your health, your [attitude](#) to feedback and guidance. How accurate your world view is, compared to reality.

It's a great filtering tool.

Based on what I find, I may recommend you a path to follow to raise your vibration.

Want to find out where you are?

Or if you think you are ready, here is a button to send me a donation

To get you this information, I have to connect to you energetically... And I find out more about you than just the numbers... I connect to your [soul](#)... and I connect to your personal hell... That's how I make my decision, on that basis. My experience of being you. No hiding.

Summary

Article Name

How to measure your vibrational frequency

Description

Vibrational frequency is a number on a logarithmic scale, and it measures how well your world view and your emotions, thinking, behavior matches reality, to what degree you have departed from human animal and rose to the level of human being. The current level of vibration of humanity is 130, which is about 1% of the way to human beingness.

FOOTNOTES

Some of the most important things are said here...

1. It is an interesting aside... but I bought the domain name, yourvibration.com because it was cheap. I had no conscious intention to do what I am doing now, raising the vibration of people so they can become human beings, instead of human machines.

But, as they say, god works in mysterious ways, and whether it is god, whether it is my inner guidance, whether my connection with All-of-it, I don't know, but I was steadily lead down this rabbit hole [🐇]

Your article is amazing, plz reply is what are the device or instruments where we can measure human being and its organ frequency.
Thanks

- [2 Sophie Benshitta Maven](#) // Sep 24, 2016 at 10:24 am

no such device, as far as I know.

I can measure spiritual vibration, but I don't know anything about organ frequency... other than 20 years ago a naturopathic doctor used something on me that told him that my colon wasn't strong enough to heal itself... He touched the sensor on my finger digits...

But what machine he used? I don't know. But eventually I proved him wrong.
